

MULTI VANIS

GLACIER

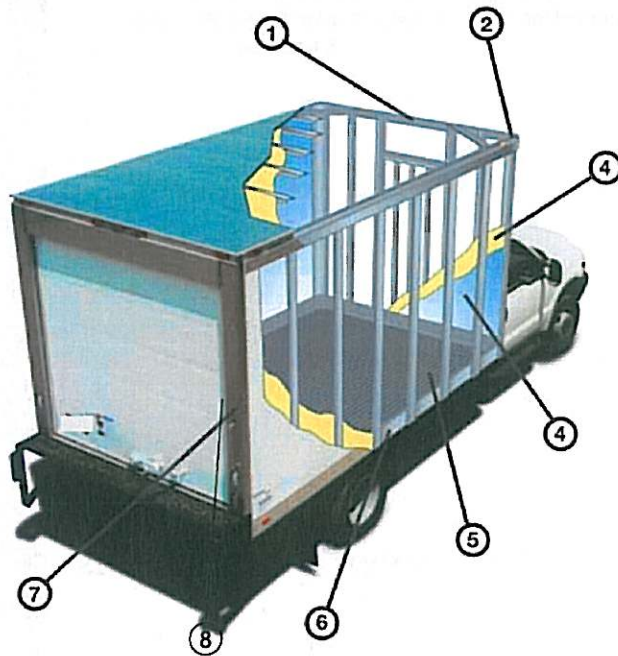

Tough, Durable Construction--Great Value in Refrigerated Transport

Superior Temperature Holding Capacity--

- Up to 4" of pour foam creating a dense, rigid high efficiency insulating barrier
- Lower operating costs—less fuel, reefer maintenance
- Deliver perishable & frozen cargo in optimum condition within HACCP guidelines

Strong, Light Weight

- Stainless steel & aluminum components resist corrosion, reduce maintenance
- Highly resilient, easy to clean fiberglass interior liners
- Can carry more, lasts longer

1. Blower type refrigeration unit is supported with a welded high-strength steel frame.
2. Radiused aluminum front cover posts, roof rails and corner caps maximize aerodynamics while reducing fuel costs.
3. Up to 4" of foamed-in-place non-CFC polyurethane insulation assures thermal efficiency.
4. Glassboard interior liners resist scuffs, dirt and stains while reducing maintenance and improving thermal efficiency.
5. Extruded aluminum floors provide exceptional durability while drains help protect cargo from accidental spillage.
6. Built up floors feature a bonus inch of insulation beneath cargo with sub-pan. Steel I-beam crossills provide strong understructure.
7. Rugged rear frames provide longer life and reduced maintenance.
8. High quality, Pressure Pillow Seal doors seal in the cold.
